TRAINING OFFER FOR FAMILIES · CÔTE D'IVOIRE

Hakili,
AI for the whole family

Turn the home into a school. Parents and children learn artificial intelligence together, with a method, with concrete results, and in line with the family's values.

Hakili: in Dioula, intelligence, the mind that understands. The word comes from the Arabic *ʿaql*, reason. Artificial intelligence is discovered as a family; everyone's *hakili* grows with it.

Yolea, Abidjan · yolea.ai · Offer 2026-2027

1 Why Hakili

> AI is already in your home, on everyone's phone. The question is no longer whether your family will use it, but how: to cheat and coast, or to learn, work better and succeed.

Children

Many pupils already have AI do their homework. They get marks but learn nothing, and lose confidence on exam day.

Parents

Many parents feel left behind. They can neither guide their children's use nor benefit from AI in their own work.

The Hakili answer

The whole family learns together, each at their own level, with one clear rule: AI is for understanding and growing, never for cheating.

2 What each family member gains

For whom	What they learn	What they can do at the end
Employed or executive parent	AI to plan, write, analyse and decide; for the keenest, building their own tools without knowing how to code	Save several hours a week and run projects with AI
Trader or entrepreneur parent	AI to prospect, sell, negotiate, follow up customers, communicate in French and English	Sell further and better, with free or low-cost tools
Child aged 6 to 10	How a computer, the internet and AI work, through play and screen-free at first; online safety	Ask good questions, spot a scam, create in ScratchJr
Teenager aged 11 to 17	AI as a tutor, checking sources, first real code, ethics	Revise alone with AI, check a fact, prepare an honest presentation
Whole family	A Family AI Charter based on its own values	Shared rules, visible progress, and time spent together

3 Four formulas, to match your goals

> From a one-Saturday discovery to a twelve-week tailored programme. All prices in CFA francs, excluding tax.

TO GET STARTED

Hakili Découverte

250,000 F CFA

per family, up to 6 people

- One 4-hour Saturday, at your home in Abidjan
- Demo and first uses for everyone
- Family AI Charter written and signed
- The homework traffic light for the children

BETWEEN FAMILIES

Hakili Cercle

450,000 F CFA

per family, group of 3 to 5 families

- 8 Saturdays of 3 hours at Yolea
- Adults and children in parallel, with two trainers
- Family Charter, a final project for everyone
- Ideal for neighbours, friends, a parish or an association

MOST CHOSEN

Hakili Essentiel

1,500,000 F CFA

per family, 6 weeks, about 30 h

- Family launch and Charter
- Adult foundation, then 4 evenings on your own work
- 6 Saturdays for the children
- Family presentation at the end

TAILORED

Hakili Intégral

from 6,800,000 F CFA

per family, 12 weeks + 3 months of follow-up, 96 h

- A personal track for each member
- A parent can build their own app
- A parent can become a trainer in turn
- Demo Day, certificates, six months of WhatsApp follow-up

Formula	Length	Hours	Venue	Payment
Découverte	1 Saturday	4 h	At home	On booking
Cercle	8 weeks	24 h	At Yolea	In 2 instalments, or monthly by Mobile Money
Essentiel	6 weeks	30 h	At home or at Yolea	In 2 instalments: at the start and mid-way
Intégral	12 weeks + 3 months	96 h	At home or at Yolea	In 3 instalments, tied to results

The Découverte price is deducted from Essentiel or Intégral if the family continues within 30 days. Payment by bank transfer or Mobile Money.

4 How it works

Step	What happens
1. Discovery call, 30 min, free	We listen to your goals, the children's ages, the parents' work and your values.
2. Tailored proposal	Within 72 hours you receive each member's programme and the price.
3. Family launch	Each person's starting assessment, a demo, writing the Family AI Charter.
4. The programme	Short, practical sessions: evenings for adults, Saturdays for children. A small challenge every week.
5. The family presentation	Everyone shows what they learned or built, in front of family and friends.
6. Follow-up	Questions on WhatsApp and, for Intégral, one session a month for three months.

5 Our method

A Family Charter based on your values

Each family writes its own Charter. The parents choose the words and references: Christian faith, Muslim faith, or moral values without religious reference. The concrete rules are the same everywhere: honesty, effort, humility, service.

The homework traffic light

Green, allowed

Ask for an explanation, examples, a revision quiz, a correction after trying alone.

Orange, with a parent

Look for ideas for a presentation, improve a text you wrote yourself.

Red, forbidden

Have AI do the homework, copy an answer, hand in AI text as your own.

The right tools, and age rules respected

We train on Claude, the adults' main assistant, and on the best current tools for each use: NotebookLM to revise, Perplexity for sourced research, DeepL to translate, Canva to create, Scratch and Teachable Machine for children. Every tool has a minimum age, and we respect it: under 13, a child has no AI account in their own name and uses AI next to a parent.

Designed for Côte d'Ivoire

- Everything works on an ordinary Android phone, with little mobile data.
- Free tools first; subscriptions stay between 0 and 30,000 F CFA a month depending on the formula.
- Sessions at home or at Yolea in Abidjan; payment by bank transfer or Mobile Money.
- Everything in French, with English as well for those aiming at international markets.

6 Progress you can see

At the start and end of the programme, each member takes the same short assessment. The family sees progress in black and white:

For whom	What we measure
Parents	Tasks done with AI each week, time saved, the project or tool built
Children	The traffic-light notebook, a start and end quiz, homework time without help
The family	The Charter signed and reread, the weekly "AI dinners" held

7 Frequently asked questions

Won't AI push my children to cheat?
That is exactly what Hakili prevents. Children learn to use AI as a teacher who asks questions, and the whole family keeps the traffic-light rule at home.

Do we need to know computers or coding?
No. Every track starts from zero. A parent who has never coded can, in Intégral, build their own app with AI's help.

From what age?
From 6 for children, with suitable activities. The youngest discover computing through play, without a personal AI account.

How much do the tools cost?
Most are free. To go further, an AI subscription for one adult costs about 12,000 F CFA a month. We tell you what to get, and when.

Can we pay in instalments?
Yes. Cercle in two instalments or monthly by Mobile Money, Essentiel in two, Intégral in three, tied to results.

Book your free discovery call

Thirty minutes to talk about your family and your goals. No commitment.
